

SHINER GAZETTE

VOL. XVIII.

SHINER, LAVACA COUNTY, TEXAS, THURSDAY MORNING, JANUARY 26, 1911.

NO. 23.

Science has developed something infinitely better than the old-style wrap or clamp.

"PITTSBURGH PERFECT" FENCES ARE WELDED BY ELECTRICITY.

This is the modern method of construction. Years of life are added through the elimination of serious fence defects.

A WRAP fence rusts, cracks the galvanizing and allows the water to attack the bare wire. A small amount of displaced galvanizing on "PITTSBURGH PERFECT" REINFORCES THE PROTECTION AGAINST RUST AT THE ELECTRICALLY WELDED JOINTS, insuring the fence STAYS CANNOT SLIP. They are always just where they were put. Stay and stand when become one place when the union is made. The fence is like a solid sheet of perforated steel.

Every Rod Is Guaranteed Perfect.

Don't show your prejudice in favor of the rapidly declining and now antiquated method you have heretofore known. To wrap your good judgment.

"PITTSBURGH PERFECT" FENCES REPRESENT PROGRESS, because thousands of thousands of dollars worth of standard material is daily welded by electricity.

The best of the average fence, based on the isolated country property, shows an electrically welded product.

If your wagon was made in a large factory, its first work welded by electricity. Examine them. Careless known to wrap your good judgment.

"PITTSBURGH PERFECT" FENCES REPRESENT PROGRESS, because thousands of thousands of dollars worth of standard material is daily welded by electricity.

The best of the average fence, based on the isolated country property, shows an electrically welded product.

You will find electrically welded fences on the current fence and wrapping machines, on many rods and buckles. Examine them. That the fence is perfectly adjustable to uneven ground. That the fence will not separate from the ground. That the fence is all right in every particular.

Could you ask any more definite protection? Your complete satisfaction is absolutely guaranteed.

Letter From Jones Co.

Hamlin, Texas, Jan. 17, 1911.

To the Gazette and its Readers:

As I haven't anything to do I will try to write a few lines to give an account of this country and the people.

We have had some pretty, summer days, but it has turned cold now and looks like rain. We need rain, but not very bad yet, as we have plenty stock water and moisture enough to plow.

Most everybody is busy plowing and getting ready for another crop. We all hope it will be a good one. We have very good prospects so far.

Say, Girls, of Lone Tree, come up here and help me catch coyotes, and we will go to the Panther and Bat caves. They are the prettiest places in Stonewall County, or in west Texas, while there are some pretty places up here. It is not far from the Double Mountains. A few of the young people get together and take a hay ride nearly every Sunday afternoon, and we have lots of fun. Sometime we go fishing, sometime hunting.

Well, as it is getting late and I have a "brone" to break tomorrow, I will close.

J. A. CRAWFORD.
